About the **SWISS** ELECTRONICS CLUSTER

The **SEC** is a platform for the electronics industry, enabling its members to develop new skills, improve their competitiveness and productivity, and maintain and develop their highly qualified personnel in Switzerland.

It initiates a virtuous circle and a value chain between the member actors by bringing together their complementary skills and networks.

It gives its members access to substantial discounts on:

- offers of advanced or basic training;
- certifications of people allowing the production of electronic assemblies to IPC quality standards;
- conferences of International or Swiss experts.

It integrates the accredited IPC Training Center of Switzerland.
